Extension of Premises

At establishments with an on-premises license, the sale and consumption of alcohol must be confined to the area that has been licensed by the Authority. The licensee needs to be aware of whether outside areas such as patios, backyards, balconies, deck, etc., were disclosed and approved when the license was issued. Disciplinary actions may be taken against a licensee who allows drinks to be consumed in unlicensed areas. Licensees can file an application with the Authority to add an unlicensed area to the licensed premises.
