* The most recent prior to the current month

This will be the first screen that you see after login. This screen contains all of the links needed to enter, edit, upload and certify the schedules.

There is a new way to deal with batch uploads. If the upload has errors the system will store the upload, display the errors and permit interactive editing to fix the errors prior to certification. If there are more than 100 errors, or if the errors cannot be corrected interactively, the batch will not be posted and existing data will not be overwritten. The batch file must be corrected.

It is very important to notice that the **RED Not certified** message is present when certification is required. A schedule that is not certified is a schedule that was not posted that month.

Adding Brands and Items: **Regular** will be discussed first. Required fields are marked with an asterisk.

In the brand information area you must select the type of beverage from the dropdown. For wine you must enter the TTB CoLA ID number (or the letter P for pending) and the alcohol content (from the dropdown or as a number under “Other”). For liquor you must enter the NYSLA brand registration number (or the letter P for pending) and the proof of the product (not shown). **Be sure that each dropdown (like Type of Beverage) has the correct value.**

In the Item/Product Information area there are several new data elements that were not previously required.

Be certain that the Alcohol Content matches the Type of Beverage.

If a wine has an alcohol content of Less than 7%, as shown, it cannot have a Type of Beverage other than “Wine Low Alcohol.”

This sample screen shows a mismatch, and you would be unable to save this record until you correct the problem. Note that if the alcohol content is less than 7% it must have a Brand Label Reg. # instead of a TTB.

You must select a type, amount, quantity, and unit of measure for each discount level. The type of discount can be either a dollar discount or a percentage discount. The unit must be either Case or Bottle and cannot be mixed on a single item (select it from “Discounts By” on the left).

The amount is the dollar amount or percentage amount that is deducted from the price of EACH case or bottle at the time of purchase . In the example above there are three discount levels, the first for \$1.00 on 3 cases, the second for \$2.00 on 5 cases, and the third for \$5.00 on 10 cases.

Alternatively, you can create a table of discount codes, shown on the next slide, and then use “Select Discount Code” for the current item. You may use the “Edit Discount Codes” button to add to or edit the Discount Code table.

Limited Availability items are indicated by selecting "L" in the column headed "Limtd Avail."

You must select an approved allocation method using the pulldown shown at left. Click "Methods" at the top to see an explanation of each approved method (see next slide).

Optionally, you may provide additional explanatory detail in the Allocation Description column.

Review the Limited Availability Advisory for additional information.

PROPER TYPES OF 'LIMITED AVAILABILITY' ALLOCATIONS

(per Advisory #2013-5 and 2013-1)

The list below sets forth methods of allocation deemed permissible by the Members of the Authority. A different method of allocation may be used for each channel. Other methods of allocation than those set forth herein may be utilized. However, if the manufacturer, importer or wholesaler utilizes another method of allocation and does not obtain prior written approval from the Authority, it does so at its own risk.

| Method | Description |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Past Sales History | Past Sales History (within preceding 12 months) with 10% holdback allowance (i.e., set aside and held in inventory) for prospective new business as long as such past sales were not themselves discriminatory |
| Published 3rd Party Sources | Lists of retailers published by respected third party sources such as: a listing as best wine list in Wine Spectator Magazine; a listing in Zagats as best restaurants; a listing in Michelin Guide or the like |
| Unsold Accounts | Retailers that have not purchased the item within the past year |
| First Come First Served | First come first served with a maximum per account |
| Advance Interest | Advance interest, provided all accounts are given reasonable notice and the opportunity to express their interest but no pre-ordering is entered into |
| Closeout Sales | The following method should be used for items designated for 'closeout sales.' -- First month filing of maximum number of cases per retailer (not to exceed 10% of the available inventory) together with a notice that in the next month and thereafter the item will be marked 'first come first served - no maximum.' -- Second and subsequent months, first come first served - no limit, until inventory of the item is depleted to zero. Manufacturers, importers and wholesalers may begin accepting such orders at 9:00 AM on the 25th day of the month prior to any such posting going into effect. NOTE: If the price is reduced in the second or any subsequent month, the process must be repeated from the beginning (with a new first month maximum case allocation filing) until inventory of the item is depleted to zero. |
| Distributor Assembled Combo Pack | Limit one per account |
| Other With Prior SLA Approval | Other |

Regardless of the method of allocation utilized, if a 70/30 split between channels is utilized, the manufacturer, importer or wholesaler will be deemed to be operating within a safe harbor as pertaining to allocations between channels for any given month. If the 70/30 split allocation formula is deviated from, the burden will be on the manufacturer, importer or wholesaler to demonstrate that an approved method of allocation from the above list was utilized for any given month.
